Date:

EnergyPeak[®] to be used in two upcoming projects

Moon Township, PA... EnergyPeak system providers, Fabral Metal Wall and Roof Systems and CENTRIA Architectural Systems have each sold an EnergyPeak Building Integrated Photovoltaic Standing Seam Roofing system for two upcoming building projects.

Fabral Metal Wall and Roof Systems, based in Lancaster, Pa., is providing a 5kW system for a home in WallaWalla, Wash. The 4,000-square-foot home will be using other energy-saving applications as well and should be completed within the next 60 days, according to the homeowner.

CENTRIA Architectural Systems, of Moon Township, Pa., is providing a 5kW system for an Architectural Metal Inc.'s shop addition in Portland, Mich. The addition is part of a metal fabrication facility.

The partnership of EnergyPeak, a development of CENTRIA Services Group of Moon Township, Pa., and UNI-SOLAR of Auburn Hills, Mich., promotes the goals of advancing the efficient and affordable integration of solar technology with standing seam metal roofing, and the adoption of building integrated photovoltaic solar standing seam on behalf of the entire standing seam industry. The EnergyPeak system integrates UNI-SOLAR[®] brand PV laminates with standing seam metal roofs, satisfying the architectural need for a building-integrated, hassle-free solar roofing option with a return on investment (ROI) in less than 10 years in some states. The result is a practical solar roofing option that can be installed with minimal effort and investment.

For a complete list of EnergyPeak providers, visit www.EnergyPeak.com. Contact these providers to use EnergyPeak for your next BIPV commercial or residential project and to obtain a customized ROI report - a detailed analysis of a project's expected energy output, available government and utility company incentives, and ROI.

About CENTRIA Services Group:

Based in Pittsburgh (Moon Township, PA), CENTRIA Services Group, is a division of CENTRIA, an international company and the U.S.'s premier supplier of architectural metal wall and roofing systems used in commercial/industrial projects. Since 1906, CENTRIA professionals have provided quality products and services for architectural and construction firms worldwide. For more information about CENTRIA call 412-299-8218 or visit www.CENTRIA.com.

About United Solar Ovonic

United Solar Ovonic, LLC, a subsidiary of Energy Conversion Devices, Inc. (NASDAQ:

ENER), manufactures and sells thin-film solar laminates that convert sunlight to energy using proprietary technology. Distributed globally under the UNI-SOLAR(R) brand, the company's products are ideally suited for cost-effective solar roofing solutions because they are lightweight, durable, flexible, can be integrated directly with building materials, and generate more energy in real-world conditions. For more information, please visit www.uni-solar.com (United Solar) and www.ovonic.com (Energy Conversion Devices).
